Data-Driven Service Integration Platform and System
Method for efficient data retrieval across multiple models
System for managing multiple models for single but possibly hybrid data storage
Data management with incremental knowledge of data model
Efficient data retrieval through rational index for multi-models

Bobby Mak

VP, GM of Mainland China at Cloudflare
Chaoyang District, Beijing, China

Summary

.

Experience

Cloudflare

Vice President, GM of Mainland China
November 2021 - Present (4 years 11 months)
Beijing City, China

Microsoft

21 years 7 months

General Manager

October 2018 - October 2021 (3 years 1 month)
Beijing City, China

Responsible for Azure's strategy, engineering, operations, and support in China, Bobby oversees an important team that assists customers and partners as they build increasingly large and complex projects on the Microsoft Azure platform to ensure their success. The team also implements case learnings and insights back into the engineering process to guarantee that the design is always customer-focused.

CAT Lead

September 2015 - September 2018 (3 years 1 month)
Beijing City, China

Leading a team of cloud architects to assist customers and partners with the largest, most complex projects built on the Microsoft platform. CAT (Customer Advisory Team) help to ensure the customer is successful and learn from those engagements and take their learnings back to the product team to ensure customer focus design.

Various roles across multiples diciplines

April 2000 - September 2015 (15 years 6 months)
Taipei City, Taiwan

Since joining Microsoft in 2000, Bobby has held roles across multiple disciplines. They include Engineering Manager in R&D, STU Lead in Enterprise Sales, Technology Center Director, CPM and Architect in Consultant Services, Evangelist in Developer Communities, Product Manager in Marketing, and Program Manager and Developer in the on-campus Server & Tools Group.
